

DATA INTEGRITY

Managing your business risk through independent, expert analysis

Data integrity – ensuring the accuracy and consistency of stored or purchased data, can often be one of the biggest challenges for a loan servicing business.

An independent, third party assessment of the accuracy of this data is essential for proper business decision making.

Target's data integrity service can provide you with a thorough analysis of loans and other secured mortgage-related debt. This analysis will provide you with a clear picture of the quality of the

loan data allowing you to make informed business decisions.

Our expert review team can deliver a forensic audit to provide you with consistent, reliable data that maximises the value achieved for a portfolio on sale or securitisation.

TARGET VALUE ADDED SERVICES

HOW WE CAN SUPPORT YOU

01_

Provision of a tailored suite of exception reports, designed for each specific portfolio.

02_

Reports run regularly at intervals to suit your individual business requirements.

03_

A detailed data audit to identify any outstanding operational actions, completeness of processing and inconsistent data.

BENEFITS TO YOUR BUSINESS

ERROR IDENTIFICATION AND REMEDY

Quickly and efficiently highlight issues arising from processing errors, configuration errors and outstanding operational actions.

EXPERT ANALYSIS

An expert review team with in depth experience of analysing and reporting on loan portfolios.

FOCUS

Outsourcing these checks to Target removes the workload and allows you to focus on the core aspects of your business.

RISK MITIGATION

Swift identification and remediation of problem data.
